PROFILE

I am a recent IT Product Development graduate from Aarhus University with big interest within concept development, programming and design. Projects where the result of the code can be experienced right away, such as web development and Augmented Reality, is very interesting to me, as you need to make sure the design and experience is perfect. I am very structured, have a good eye for detail, and I am always ready to learn new methods and technologies.

WORK EXPERIENCE

FEB 18 - JUN 18

RESEARCH ASSISTANT

Aarhus Universitet

Conduct user studies and develop prototypes within e.g. Augmented Reality og web.

SOFA-IT

Student organization for IT product development students .

FEB 12 - OKT 16 TUTOR

Mat/Fys-Tutorgruppen

Plan and execute the introduction days for new students at IT product development.

PERSONAL INTERESTS

I like to be active with dance, fitness, skiing, or a hike in beautiful nature. I also like to cook for friends and once in a while zone out by myself by playing Nintendo - I can highly recommend Zelda and Super Mario.

I love to travel and I do it as often as possible. Both on short weekend trips and longer travels to more exotic destinations. My longest trip was 8 month in New Zealand, where I both worked and travelled. That was a great experience which made a lot new friends from all over the world.
